Your patch test results indicate that you have a contact allergy to Amerchol L101. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching and fluid-filled blisters.

Where is Amerchol L101 found?
Amerchol L101 is a trade name of products containing lanolin. It is found in cosmetics, pharmaceuticals, topical drugs, furniture polish, leather, metal corrosion prevention products, paper, inks, textiles, furs, cutting oils, and waxes.

How can you avoid contact with Amerchol L101?
Avoid products that list any of the following names in the ingredients:

- Amerchol L-101
- Americhol L101
- Wool alcohol
- Lanolin alcohol
- CAS RN: 8027-33-6
